

DX99

FINE POLISH PASTE

Description

Highly effective white polishing compounds for passenger cars topcoats.

Products

DX99 Fine Polish Paste

Properties

- Easy and rapid elimination of sanding marks
- Suitable for all original and repair coatings
- Low level of dust and minimum workspace pollution
- High gloss

Substrates

- All original and repair coatings

RECOMMENDED USE

Surface preparation

Before using DX99 Fine Polish Paste, clean the surface, sand and degrease properly.

Equipment cleaning

Not applicable

DX99

FINE POLISH PASTE

Remarks

- Use a compounding foam pad
- Pad should be clean and free of dust and dirt
- Soak the pad in clean water then squeeze out any excessive water
- Fit compounding pad to a polishing machine and spin off to remove any excessive water
- Work on small area in applying DX99 Fine Polish Paste to pad or directly to panel
- Begin buffering at speed of 1200-1500 RPM and medium pressure
- Start polishing with the pad head flat on the surface
- Reduce speed and/or pressure when buffering panel edges or ridges
- Polish until desired finish is achieved
- Wipe clean using micro fibre polishing cloth or equivalent

Product data

VOC content 194 g/li
 Package viscosity: paste
 Theoretical coverage: Not applicable

Products	Packages	Shelf life at 20°C (year)	Density (kg/l)
